

SAFETY POLICY STATEMENT

The purpose of SCI's safety program is to reduce the human pain and suffering associated with injuries and accidents. Therefore, the safety program focuses on eliminating unsafe acts, the leading cause of injuries and accidents in our industry.

It is Sicklesteel Cranes goal to achieve a zero accident rate and have no OSHA recordable injuries.

SCI reduces unsafe acts with the following tools:

Company Policy -- a collection of safety rules and procedures, above and beyond state law and industry standards, which SCI has found necessary to do our jobs safely and productively.

Employee Education -- through manufacturer training, union training, classes, orientations, safety meetings and supervisor involvement.

Employee Involvement -- all employees are encouraged to contribute to the safety program.

Personal Protective Equipment -- the company has a firm belief that proper protective equipment worn by employees will reduce accidents.

Accident Investigation -- finding out the causes of accidents for safety education and to prevent their reoccurrence.

Drug and Alcohol Program -- the company strives to create a drug-free work place. A drug-free work place is a safer work place.
